You can buy an updated version here: Transport sheets for kindergarten Why is preschool learning important? Children are curious, and their questions about life around them are endless. The answer often leads to the next question. That is why pre-school learning is such an important part of their development, because they are at a stage where they build blocks for knowledge, information and judgment. A good preschool learning program should help your child create their own opinions, not take other facts as facts. This should help the child develop patience and perseverance. When a child discovers new things, a good scientific program should also open up new opportunities for research, with great anticipation of new discoveries. As a guide, help preschoolers 1. Explore materials, events, and objects 2. Ask questions and examine them 3. Observe, describe and record observations 4. Identify patterns and relationships 5. Collaborate (sharing, discussing, and listening to team members) I hope these worksheets are a great start to preschool discoveries. Here is a special print package for vehicle lovers. Over 80 fun pages, transport sheets with lots of educational activities all based on vehicles that drive on land, fly across the sky or swim in the ocean. You can see all our other worksheets and classes for Kindergarten Themes.
